

ENERGY SAVING & SOUND INSULATION SYSTEMS

Your new apartment at **Village Park of Bloomington** is equipped with many features that will save energy, save money on utility bills and make your home more comfortable.

SOME OF THESE ENERGY SAVING FEATURES ARE:

NEW WINDOWS & SLIDING PATIO DOORS *(Installed in 2007)*

Double-pane windows and two, double-pane glass doors in the living room keep sound out and your heat and air conditioning in. This lowers your utility costs and blocks all noise from the MSP airport.

CEILING FANS

Ceiling fans help circulate air, pushing heat down in the winter and pulling it up in the summer lowering utility costs.

BATHROOM EXHAUST FANS

Fans in every bathroom help pull moisture from the bathroom.

AIR CONDITIONING COVERS

Covers prevent cold drafts from entering your apartment on windy days.

LOW-FLOW TOILETS & SHOWER HEADS

Low-flow shower heads provide great water pressure while reducing the amount of water used per minute, lowering your water bills. Low-flow toilets use less water per flush, also lowering your water bills.
