

MDU Quick Connect Instructions

1. Connect to the appropriate wireless SSID or an Ethernet outlet in your unit.
2. Open a web browser window. If you are not automatically directed to the portal page, navigate to <http://portal.sdLwifi.com/con>. You will be automatically redirected to the portal page.
3. Bookmark the portal page for easy access in the future.
4. If you are an existing Suddenlink User, type your email and password, then click **Log In** to manage your account.
5. If you are a New User, select **New User? Sign Up Here** option shown below:

7. On the account management page, click the **Add the device I am using** button.
8. Name your Device and click the “Add This Device” button.

The screenshot shows the Suddenlink website interface for adding a device. At the top left is the Suddenlink logo. Below it, the heading "Resident Internet Service" is displayed. Underneath the heading, the text "Add This Device 14109fd2c427" is shown. A form field labeled "Description:" contains the text "Thom's Macbook PRO". Below the form field are two buttons: "Back" and "Add This Device".

Your device will be authenticated to the network and you will be connected to the Internet.
