

## Dojo Networks Internet Information

---

Your included internet will be provided by Dojo Networks, a leading provider of high-speed internet to multi-unit buildings.

### Having connection problems?

Call Dojo at 814-308-0817

Or email [support@dojonetworks.com](mailto:support@dojonetworks.com)

Apartment Store Staff is **NOT** equipped to resolve connection issues

### Here are a few things you need to know

- Your unit is equipped with an ethernet port in each bedroom
- You must supply your own WiFi router and/or devices (Wi-Fi Router, Computer, Streaming Device) and ethernet cables. You need to use an 802.11AC router at a minimum for WiFi.
- The following devices are NOT compatible: Combo routers such as Cable Modem/WiFi Routers or DSL/WiFi Routers. Older cheaper wireless routers are not recommended for use in apartment environments for example N150/N300/N600/N900 routers will not work well. You can provide your own router or rent a supported router from DojoNetworks.
- For best WiFi performance it is recommended that on your router you name the 2.4ghz and 5ghz SSID (Wireless Network Name) something different and that you connect to the 5ghz SSID by default. Check your router documentation for support.
- **Once plugging in you must authenticate your service. Dojo networks will email you with login information.**
- You are provided with 50mb/s speed per unit
  - **Want more speed?** Visit <http://www.dojonetworks.com> for options

Interested in Television?

Contact **Atlantic Broadband** at (888) 536-9600 or visit [atlanticbb.net](http://atlanticbb.net)

You may also consider the following as alternatives to cable.

- **Sling.com, Direct TV Now, Youtube TV, Hulu+ live TV**
